ISM Services, Inc.

ISM

At-a-Glance

ISM Services, Inc.'s expertise, knowledge, and services sets us apart in our capability to partner with clients and achieve strategic and operational goals. Our team of experts brings the knowledge gained from a wide range of projects. We recognize that our future is based on our ability to establish and maintain long-lasting relationships with our clients.

TYPES OF SERVICES

* **Workplace & Asset Management**
* **Software Solutions**
* **Design Services**
* **Technical Furniture Installation**

"I have been extremely pleased working with ISM Services, Inc. and have been surprised with how quickly and professionally the firm has handled our project. The guidance they have offered us was simply a reflection of their guidance within the firm. We doubt we would have received that caliber of service at another firm. Overall, the pricing and quality of services offered by ISM Services, Inc. represents a good value for their clients. Thank you."

Thomas Tretheway
Smola Construction Company

Offering the Best Solutions

Founded in 2004, ISM Services, Inc. quickly established itself as a leader in the development and implementation of Comprehensive Facilities Management Services. With an ever-growing staff of hand-picked experts, we now offer a wide variety of services. Our solutions are delivered with the right combination of leading-edge technologies, years of experience, and unparalleled support.

Our Mission is to provide our customers with comprehensive, proactive Programs and Services that exceed requirements and are delivered on time, every time; have personnel with the vision and knowledge to recognize the future needs of our customers and develop new applications to meet their needs; provide best-in-field and best-in-business practices for streamlined, efficient planning and execution; and are the best value for the money.

Unlike other companies, ISM Services offers:

Workplace & Asset Management Solutions

As a leader in the development and implementation of **Integrated Workplace Management System** (IWMS) Solutions, ISM Services, Inc. help our clients achieve success by assessing their needs, refining day-to-day operations and processes, and implementing a single source for information. Most of our customers choose our Implementation Services to minimize Cost to Implement, manage Risk, and maximize their Return-on-Investment. ISM is an ARCHIBUS® Value-Added Reseller (VAR) and a member of the ARCHIBUS Developer Network. Our many successes in all varieties of deployments enable us to swiftly deliver solutions that fit our client's needs.

ISM Services, Inc. has also created a **Key Control** application within ARCHIBUS that provides an accurate electronic inventory of your physical keys. This enables you to track and manage key location, track personnel access throughout your facility, and to pair physical key data with the facility management data already in your ARCHIBUS system (e.g., personnel, rooms, equipment, and furniture).

Managing a comprehensive, defensible health and safety program to protect both individuals from hazards and the overall organization from liability can be overwhelming. The **ARCHIBUS Environmental Health & Safety** (EH&S) application enables managers to quickly associate incidents with locations, equipment, and personnel and easily link employee training records and/or medical monitoring to these same incidents. As part of a comprehensive Environmental Health & Safety management program, this application is a critical tool to help document evidence of compliance for internal standards or external regulatory requirements.

Software Solutions

ISM's customized **Software Design Services** bring innovative solutions and value to your organization and clients. ISM has the expertise to deliver cost-appropriate,

stable software solutions to match your requirements in **Application Development**, **Integration** and **Customization**, Migration and Enhancement of Legacy Applications, Application Support and Improvement, and Project Rescue. In addition to application development, we also provide related services such as application support, maintenance, re-engineering, and testing.

ISM Services, Inc. uses the latest web development technologies for **Web Application Development** and has achieved commercial success delivering high performance web applications with complex functionalities. Our services include web enhancement of legacy system, Internet strategy development, e-commerce web development, and business process management.

Design Services

ISM Services, Inc. has over 100 years of combined Commercial and Residential drafting experience within our company. We provide cost-effective commercial and residential **Computer Aided Drafting and Design (CADD) Services** to our customers allowing them to focus on their core business without sacrificing quality to their clients. We are committed to supplying your company with the most thorough and complete drafting service available.

ISM **3D Visualization Services** (3DVS) provides a powerful competitive advantage in designing and promoting your project thereby reducing expensive multiple changes and oversights from inception to completion. ISM imports 2D blueprints and schematics created in CAD applications (such as AutoCAD, Maya and Revit) into game engine software to create fully immersive 3D virtual walkthroughs of residential and commercial property. ISM is currently developing a 3D **Fully Immersive Training Environment** to provide collaborative training simulations, also.

ISM Services **3D Printing Services** is your source for custom-manufactured prototypes, one-of-a-kind items, or 3D CAD files. Our team can quickly create complex shapes or functional parts using Plastic Jet Printing (PJP) to convert your vision to a 3D printed object enabling testing for form, fit, and function right away.

Technical Furniture

You can rely on ISM Services when you outfit your facility or complete your expansion. We offer **Assembly**, **Installation**, and/or **Relocation** of technical furniture systems. You can be assured of proper assembly and installation according to the plan, ensuring each product will deliver value throughout its lifecycle.

Adapting Technology to a Changing World
