

TRAINING SERVICES

Training Services

Since opening in 2004, ISM has hand-picked an experienced staff of training and support service providers for the ARCHIBUS system and their customers. Additionally, we are prepared to delivery two training options, based on the needs of your organization and preferred teaching style. These options allow organizations to choose what they are most comfortable with.

TRAINING OPTION A—WEB-BASED LIVE TRAINING

ISM offers web-based training for a recommended group of up to 15 people. This training is live, where questions can be asked during the session, and users can interact with the trainer. This training must be scheduled with the Trainers, at least three weeks in advance. In addition to the module specific training session, you can also contact ISM for custom training offerings, we will work with you to determine the best training solutions to fit your needs.

TRAINING OPTION B—ON-SITE TRAINING

In addition to the web-based training option, ISM can provide on-site training. An experienced trainer will come on-site at your facility and provide your organization with training tailored to your organization and its planned use of the ARCHIBUS system. Trainers can be on-site for one to many days, and are there to focus on servicing you as a client.
